CINCH THE MESS IN SECONDS.

No Knots. No Mess. No Stress.

here's a reason drawstring bags have become the new kitchen standard. The built-in drawstring closure on GAIC bags creates a secure, odor-trapping seal that keeps your space smelling fresh long after the bag is full.

Reinforced handles mean the bag won't snap mid- carry — even when loaded to the brim. Designed for tall kitchen bins, GAIC Drawstring Bags hug the rim perfectly, staying in place while you fill them up. Available in large and extra-large sizes for every household need.

Side Stat Block:

- Secure drawstring closure
- Odor-lock technology
- Reinforced carry handles
- Rim-hugging fit design

No more fighting with flimsy bags that split at the worst possible moment. GAIC Drawstring Trash Bags are engineered with puncture-resistant film that stands up to sharp edges, wet waste, and overstuffed bins. The drawstring itself is woven into the hem — not glued or tacked on — so it pulls evenly every time without tearing through the plastic. Whether you're clearing out leftovers, carrying coffee grounds, or bagging up a week's worth of takeout containers, the bag moves with you, not against you.

"One pull. Sealed tight. Odor locked out."
